Overview

The Jetson AGX Xavier H01 Kit is an alternative to the NVIDIA Jetson AGX Xavier Developer Kit, built with a Jetson AGX Xavier Module and the same form factor carrier board, pre-installed with JetPack System, cooling fan, and aluminum case. It delivers up to 32 TOPs AI performance in as little as 10W with a 512-core Volta GPU, 8-core ARM v8.2 64-bit CPU, 32GB LPDDR4x, 32GB eMMC 5.1, and interfaces including RJ45, USB, DP, CSI-2, NVMe, PCIe, Wi-Fi, Bluetooth, UART, and 40-pin GPIO.

Key Features

- **Alternative to NVIDIA Jetson AGX Xavier Developer Kit**, built with Jetson AGX Xavier Module and the same form factor carrier board, pre-installed with JetPack System, cooling fan, and aluminum case.
- **Deploy neural networks faster at edge devices**, running in as little as 10W and delivering up to 32 TOPs AI performance.
- **Powerful architecture**: 512-core Volta GPU with Tensor Cores and 8-core ARM v8.2 64-bit CPU, 8MB L2 + 4MB L3.
- **Rich interfaces**: RJ45, 2Xusb3,1. DP,(16X) CSI-2 Lanes, NVMe, PCIe x1, 2xUSB 3.0, USB 2.0, 2.4/5GHz Wi-Fi, Bluetooth, UART and 40-pin GPIO.
- **Sufficient storage for complex AI workloads**: 32GB 256-Bit LPDDR4x | 137GB/s, 32GB eMMC 5.1, support NVMe expand storage.
- **Rapid product development**, supported by NVIDIA JetPack and DeepStream SDKs, as well as CUDA®, cuDNN, and TensorRT software libraries.

FCC Requirement

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

15.21

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses, and can radiate radio frequency energy.

If not installed and used in accordance with the instructions, it may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
