Applications

- **Jetpack 7.2 update:** Use Jetson Develop Tool to update to Jetpack 7.2 for agentic AI skills package, Yocto BSP and memory optimization. Learn more about Jetpack 7.2 here and a deep dive into what you can get from Jetpack 7.2.
- **reComputer AI Lab:** Seeed offers reComputer AI lab, a platform that helps you deploy AI applications with one-click tools and ready-to-use resources. It includes optimized edge AI model demos for CV, LLM, VLM, interactive tutorials, deployment tools, containerized applications, and community projects to speed up development on Jetson.
- **Jetson Examples:** We have Jetson-example prepared for you! It offers one-line deployable projects compatible with generative AI large models, including LeRobot, Ollama, Qwen, etc; with computer vision such as Ultraslytics YOLO26. We have configured all environment setups for you to provide a single command deployment of projects, easy to try out/verify if the trending model performance is suitable for your GPU needs and application scenarios.
