reComputer J1020- Edge AI Device with Jetson Nano module, Aluminium case, pre-installed JetPack System

reComputer J1020 is a hand-size edge AI device with Jetson Nano, 0.5 TFLOPs, and pre-installed JetPack for building next-gen autonomous machines.

SKU	UPDATED	PRICE

Overview

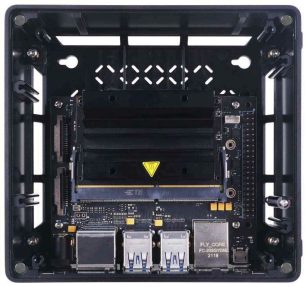

The reComputer J1020 is a hand-size edge AI device built with the NVIDIA Jetson Nano 4GB Production Module, featuring 128 CUDA cores delivering 0.5 TFLOPs (FP16) for AI workloads. It includes pre-installed NVIDIA JetPack SDK and extensive I/O such as Gigabit Ethernet, 4x USB 3.0, GPIO, and CSI, enabling rapid development of autonomous machines at the edge.

Key Features

- **NVIDIA Jetson Nano Dev Kit alternative**: hand-size Edge AI device built with Jetson Nano 4GB Production Module, the carrier board brings extensive I/Os: GPIO, CSI, Gigabit Ethernet, 4 x USB 3.0 Type A, 1 x Micro-USB, onboard 16 GB eMMC, Please check **here** for SSD storage expansion.
- **128 NVIDIA CUDA® cores deliver 0.5 TFLOPs (FP16)** to run AI frameworks and models for applications like image classification, object detection, segmentation, and speech processing.
- **Pre-installed NVIDIA Jetpack,** JetPack SDK includes a board support package (BSP), Linux OS, NVIDIA CUDA, cuDNN, and TensorRT software libraries for deep learning, computer vision, GPU computing, multimedia processing, etc.
- **Support entire Jetson software stack** and various **developer tools** for building fast and robust AI application provided by Seeed Edge AI partners.

Applications

- **Build Next-Gen Autonomous Machine at the Edge:** For both beginners and experts, it is designed to help you to build your next-gen autonomous machine at the edge.

Part List

Acrylic Cover	x1
Aluminum Frame	x1
Jetson Nano module	x1
Heatsink	x1
A206 Carrier board	x1
12V/2A Power adapter (with 5 interchangeable adapter plugs)	x1

FCC Requirement

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) this device may not cause harmful interference, and

(2) this device must accept any interference received, including interference that may cause undesired operation.

15.21

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses, and can radiate radio frequency energy.

If not installed and used in accordance with the instructions, it may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
