reComputer Super J4012 - Advanced Edge AI Computer with NVIDIA® Jetson™ Orin™ NX 16GB in Super Mode

reComputer Super J4012: Advanced edge AI computer with NVIDIA® Jetson™ Orin™ NX 16GB in Super Mode, up to 157 TOPS, built for vision AI, robotics, and generative AI deployment.

Overview

The reComputer Super J4012 is an advanced edge AI computer featuring the NVIDIA® Jetson™ Orin™ NX 16GB in Super Mode, delivering up to 157 TOPS with configurable 10W–40W power modes and robust -20°C to 60°C operation. It includes rich interfaces such as 2x RJ45, SIM card, 4x USB 3.2, HDMI 2.1, CAN, M.2 Key E/M, Mini-PCIe, and 4x MIPI-CSI, and comes ready for deployment with JetPack 6.2 and a 128GB NVMe SSD for AI NVR/AMR, vision AI, robotics, and generative AI applications.

Key Features

01 **Super Boost AI Performance**

Delivers up to 157 TOPS in MAXN Super Mode, ideal for demanding applications like vision AI, robotics, and generative AI.

02 **Energy-Efficient Operation**

Configurable power modes from 10W to 40W allow for optimized performance and energy consumption.

03 **Robust Thermal Design**

Operates reliably in temperatures from -20°C to 60°C at 40W, and up to 65°C at 25W.

04 **Rich interfaces**

Features 2x RJ45, SIM card, 4x USB 3.2, HDMI 2.1, and CAN. Also including M.2 Key E/M, Mini-PCIe, 4x Mipi-CSI for connectivity and cameras.

05 **Ready for Deployment**

Pre-installed with JetPack 6.2 (Supports JP7.2) and a 128GB NVMe SSD, supporting AI frameworks like NVIDIA Isaac, Hugging Face, and ROS2/1, enabling rapid development of various AI applications.

06 **Jetson Orin Nano / Orin NX Modules Performance with Super Mode**

07 **Memory Bandwidth Upgrade**

08 **Higher Throughput**

09 **Improved higher frame rate processing**

10 **Enhanced Power Management**

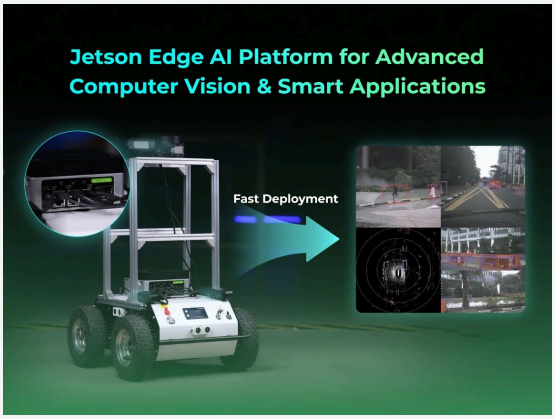

11 **Reduced Inference Latency**

Hardware Overview

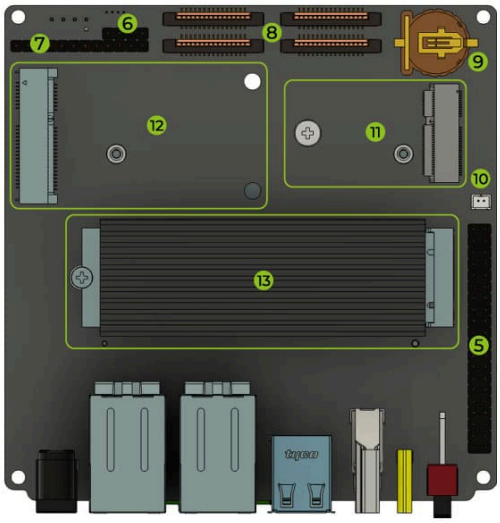

1. DIP Switch
2. Type C USB 2.0
3. HDMI 2.1
4. 4x Type A USB 3.2
5. 2x Pinhole Button
6. 2x LED Indicator
7. SIM Card Slot
8. 2x RJ45 Ethernet Port
9. Barrel DC Jack 5525

Top View

1. Nvidia Jetson Orin Module
2. Extension Board
3. 4-Pin Fan Connector (5V PWM)
4. 4-Pin Fan Connector (12V PWM)

Bottom View

5. 40-Pin Extension Header
6. CAN Header
7. 12-Pin control and UART header
8. 4x 15-Pin MIPI CSI
9. RTC Battery Socket(CR1220)
10. RTC 2-Pin Header(3V)
11. M.2 Key E Slot
12. Mini PCIe Slot
13. M.2 Key M Slot(with SSD)

Applications

- **From Zero to Real Projects:** Master Linux basics on the Jetson environment to build an end-to-end AI NVR/AMR.
- **Hardware Integration:** Tailored for reComputer Jetson devices for a seamless, out-of-the-box experience.
- **Coverage of Cutting-Edge Domains:** Deep dive into CV, GenAI, ROS, agentic AI, and TensorRT optimization.
- **Toolchain Mastery:** Hands-on tutorials with NVIDIA JetPack SDK, CUDA, DeepStream, PyTorch, and TensorFlow.
- **reComputer AI Lab:** Seeed offers reComputer AI Lab — a platform that helps you deploy AI applications with one-click tools and ready-to-use resources. It includes optimized edge AI model demos for CV, LLM, VLM, interactive tutorials, deployment tools, containerized applications, and community projects to speed up development on Jetson.
- **Seeed Jetson Develop Tool:** Seeed Jetson Develop Tool is a desktop client for all developers who are going to use reComputer Jetson device for the very first time. It brings the common bring-up and development workflow into one GUI: firmware flashing, first-boot initialization, device diagnostics, remote development, app deployment, skill-based automation, OTA updates, and community resources.
- **Jetson-example One-Line Deployable Projects:** Jetson-example offers one-line deployable projects compatible with generative AI large models, including LeRobot, Ollama, Qwen, etc; with computer vision such as Ultraslytics YOLO26. We have configured all environment setups for you to provide a single command deployment of projects, easy to try out/verify if the trending model performance is suitable for your GPU needs and application scenarios.
- **Multi-Camera Vision AI:** Powered by the reComputer Super AI box, the system supports up to 4x USB cameras or MIPI-CSI cameras to create a 360° panoramic vision network. Leveraging the advanced spatial foundation model, it processes multiple real-time video streams simultaneously to deliver accurate depth perception, comprehensive environmental awareness, and real-time blind-spot elimination for safer autonomous operation.
